

Reeds Vol 2: Applied Mechanics for Marine Engineers (Reeds Marine Engineering and Technology Series)

By Paul Anthony Russell

Reeds Vol 2: Applied Mechanics for Marine Engineers (Reeds Marine Engineering and Technology Series) By Paul Anthony Russell

The book covers the principal topics in applied mechanics for professional trainees studying Merchant Navy Marine Engineering Certificates of Competency (CoC) as well as the core syllabi in applied mechanics for undergraduates studying for BSc, BEng and MEng degrees in marine engineering, naval architecture and other marine technology related programmes.

The revised version takes into account the need of these students, recognising recent changes to the Merchant Navy syllabus and current pathways to a seagoing engineering career, including National diplomas, Higher National Diploma and degree courses.

Basic principles are dealt with, beginning at a fairly elemental stage, with this new edition applying the underlying principles to a shipping environment. Each chapter has fully worked examples interwoven into the text, with test examples set at the end of each chapter. Other revisions include examples reflecting modern machines and practice, current legislation and current syllabi.

Editorial Review

About the Author

Paul A Russell was Head of School at the National Sea Training Centre at North West Kent College, UK as well as lecturer in Marine Engineering at the University of Greenwich. He is Managing Director of Thamesview Maritime Limited, a marine engineering consultancy specialising in the professional development of marine engineers and has previously worked as the Editor for the journal Marine Propulsion and Auxiliary Machinery. Paul has also completed two terms in office as the Chair of the South East branch of the Institute of Marine Engineering Science and Technology.

Users Review

From reader reviews:

Troy Riley:

In this 21st millennium, people become competitive in most way. By being competitive at this point, people have do something to make all of them survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated that for a while is reading. Yes, by reading a guide your ability to survive raise then having chance to stand than other is high. For yourself who want to start reading the book, we give you this particular Reeds Vol 2: Applied Mechanics for Marine Engineers (Reeds Marine Engineering and Technology Series) book as beginner and daily reading reserve. Why, because this book is more than just a book.

Myrtle Hamer:

The particular book Reeds Vol 2: Applied Mechanics for Marine Engineers (Reeds Marine Engineering and Technology Series) will bring you to the new experience of reading a new book. The author style to clarify the idea is very unique. If you try to find new book to learn, this book very suited to you. The book Reeds Vol 2: Applied Mechanics for Marine Engineers (Reeds Marine Engineering and Technology Series) is much recommended to you to read. You can also get the e-book from official web site, so you can more easily to read the book.

John Pasko:

Reading can called brain hangout, why? Because while you are reading a book particularly book entitled Reeds Vol 2: Applied Mechanics for Marine Engineers (Reeds Marine Engineering and Technology Series) your thoughts will drift away trough every dimension, wandering in most aspect that maybe mysterious for but surely will become your mind friends. Imaging just about every word written in a guide then become one web form conclusion and explanation in which maybe you never get prior to. The Reeds Vol 2: Applied Mechanics for Marine Engineers (Reeds Marine Engineering and Technology Series) giving you an additional experience more than blown away your head but also giving you useful info for your better life within this era. So now let us demonstrate the relaxing pattern is your body and mind are going to be pleased when you are finished reading through it, like winning a sport. Do you want to try this extraordinary spending spare time activity?

Clyde Miller:

Do you really one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Make an effort to pick one book that you never know the inside because don't judge book by its handle may doesn't work is difficult job because you are afraid that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer can be Reeds Vol 2: Applied Mechanics for Marine Engineers (Reeds Marine Engineering and Technology Series) why because the wonderful cover that make you consider regarding the content will not disappoint you. The inside or content will be fantastic as the outside or cover. Your reading 6th sense will directly show you to pick up this book.
