**Time Series Analysis: Forecasting and Control (Wiley Series in Probability and Statistics)** By George E. P. Box, Gwilym M. Jenkins, Gregory C. Reinsel, Greta M. Ljung

## Praise for the *Fourth Edition*

**"The book follows faithfully the style of the original edition. The approach is heavily motivated by real-world time series, and by developing a complete approach to model building, estimation, forecasting and control."**

## - *Mathematical Reviews*

Bridging classical models and modern topics, the *Fifth Edition* of *Time Series Analysis: Forecasting and Control* maintains a balanced presentation of the tools for modeling and analyzing time series. Also describing the latest developments that have occurred in the field over the past decade through applications from areas such as business, finance, and engineering, the *Fifth Edition* continues to serve as one of the most influential and prominent works on the subject.

*Time Series Analysis: Forecasting and Control, Fifth Edition* provides a clearly written exploration of the key methods for building, classifying, testing, and analyzing stochastic models for time series and describes their use in five important areas of application: forecasting; determining the transfer function of a system; modeling the effects of intervention events; developing multivariate dynamic models; and designing simple control schemes. Along with these classical uses, the new edition covers modern topics with new features that include:

- A redesigned chapter on multivariate time series analysis with an expanded treatment of Vector Autoregressive, or VAR models, along with a discussion of the analytical tools needed for modeling vector time series
- An expanded chapter on special topics covering unit root testing, time-varying volatility models such as ARCH and GARCH, nonlinear time series models, and long memory models

- Numerous examples drawn from finance, economics, engineering, and other related fields
- The use of the publicly available R software for graphical illustrations and numerical calculations along with scripts that demonstrate the use of R for model building and forecasting
- Updates to literature references throughout and new end-of-chapter exercises
- Streamlined chapter introductions and revisions that update and enhance the exposition

*Time Series Analysis: Forecasting and Control, Fifth Edition* is a valuable real-world reference for researchers and practitioners in time series analysis, econometrics, finance, and related fields. The book is also an excellent textbook for beginning graduate-level courses in advanced statistics, mathematics, economics, finance, engineering, and physics.

The late **George E. P. Box, PhD**, was professor emeritus of statistics at the University of Wisconsin-Madison. He was a Fellow of the American Academy of Arts and Sciences and a recipient of the Samuel S.

Wilks Memorial Medal of the American Statistical Association, the Shewhart Medal of the American Society for Quality, and the Guy Medal in Gold of the Royal Statistical Society. Dr. Box was also author of seven Wiley books.

The late **Gwilym M. Jenkins, PhD**, was professor of systems engineering at Lancaster University in the United Kingdom, where he was also founder and managing director of the International Systems Corporation of Lancaster. A Fellow of the Institute of Mathematical Statistics and the Institute of Statisticians, Dr. Jenkins had a prestigious career in both academia and consulting work that included positions at Imperial College London, Stanford University, Princeton University, and the University of Wisconsin-Madison. He was widely known for his work on time series analysis, most notably his groundbreaking work with Dr. Box on the Box-Jenkins models.

The late **Gregory C. Reinsel, PhD**, was professor and former chair of the department of Statistics at the University of Wisconsin-Madison. Dr. Reinsel's expertise was focused on time series analysis and its applications in areas as diverse as economics, ecology, engineering, and meteorology. He authored over seventy refereed articles and three books, and was a Fellow of both the American Statistical Association and the Institute of Mathematical Statistics.

**Greta M. Ljung, PhD**, is a statistical consultant residing in Lexington, MA. She received her doctorate from the University of Wisconsin-Madison where she did her research in time series analysis under the direction of Professor George Box. Dr. Ljung's career includes teaching positions at Boston University and Massachusetts Institute of Technology, and a position as Principal Scientist at AIR Worldwide in Boston. Her many accomplishments include joint work with George Box on a time series goodness of fit test, which is widely applied in econometrics and other fields.

## **Users Review**

### **From reader reviews:**

#### **James Marcotte:**

In this 21st century, people become competitive in each way. By being competitive at this point, people have do something to make all of them survives, being in the middle of typically the crowded place and notice by simply surrounding. One thing that often many people have underestimated it for a while is reading. Yeah, by reading a e-book your ability to survive enhance then having chance to stay than other is high. For you personally who want to start reading some sort of book, we give you this Time Series Analysis: Forecasting and Control (Wiley Series in Probability and Statistics) book as basic and daily reading publication. Why, because this book is greater than just a book.

#### **David Patton:**

The book Time Series Analysis: Forecasting and Control (Wiley Series in Probability and Statistics) will bring that you the new experience of reading any book. The author style to elucidate the idea is very unique. In the event you try to find new book you just read, this book very suitable to you. The book Time Series Analysis: Forecasting and Control (Wiley Series in Probability and Statistics) is much recommended to you

to read. You can also get the e-book from official web site, so you can more easily to read the book.

**Alva Sexton:**

The book untitled Time Series Analysis: Forecasting and Control (Wiley Series in Probability and Statistics) contain a lot of information on the idea. The writer explains her idea with easy approach. The language is very straightforward all the people, so do not necessarily worry, you can easy to read the idea. The book was written by famous author. The author provides you in the new age of literary works. You can read this book because you can read on your smart phone, or model, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site and also order it. Have a nice examine.

**Mark Johnson:**

You can get this Time Series Analysis: Forecasting and Control (Wiley Series in Probability and Statistics) by look at the bookstore or Mall. Just viewing or reviewing it can to be your solve trouble if you get difficulties on your knowledge. Kinds of this publication are various. Not only simply by written or printed but additionally can you enjoy this book by simply e-book. In the modern era like now, you just looking from your mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose appropriate ways for you.
