Models of My Life (MIT Press) By Herbert A. Simon

In this candid and witty autobiography, Nobel laureate Herbert A. Simon looks at his distinguished and varied career, continually asking himself whether (and how) what he learned as a scientist helps to explain other aspects of his life. A brilliant polymath in an age of increasing specialization, Simon is one of those rare scholars whose work defines fields of inquiry. Crossing disciplinary lines in half a dozen fields, Simon's story encompasses an explosion in the information sciences, the transformation of psychology by the information-processing paradigm, and the use of computer simulation for modeling the behavior of highly complex systems. Simon's theory of bounded rationality led to a Nobel Prize in economics, and his work on building machines that think -- based on the notion that human intelligence is the rule-governed manipulation of symbols -- laid conceptual foundations for the new cognitive science. Subsequently, contrasting metaphors of the maze (Simon's view) and of the mind (neural nets) have dominated the artificial intelligence debate. There is also a warm account of his successful marriage and of an unconsummated love affair, letters to his children, columns, a short story, and political and personal intrigue in academe.

Editorial Review

From Publishers Weekly

Simon observes himself as an object for scientific inquiry in this refreshingly innovative autobiography. Principal architect of the field of artificial intelligence, this polymath has applied the metaphor of a decision-making maze to human cognition, management science, economics and politics--winning a Nobel Prize in 1978. Instead of a dry, rationalist exercise, this traipse through the branching paths of his personal labyrinth turns out to be a quirky, soul-baring self-analysis. In early chapters on his introspective Milwaukee childhood, he refers to himself in the third person as "the boy." He is equally objective in discussing his 1930s flirtation with political radicalism, his half-century-long marriage and the politics of scientific infighting. This is a disarming self-portrait by a gifted writer who believes that the real self is an illusion and that one's life need not have a unifying thread. Photos.

From Library Journal

Simon is a veritable Renaissance man: considered the father of artificial intelligence, he also contributed to the theory of organizational behavior and was the first social scientist to be admitted to the National Academy of Science. In this extensive and entertaining autobiography, he writes smoothly and provocatively on a range of topics from his early youth to his years at UC Berkeley, Illinois, and, finally Carnegie Mellon. He is surprisingly candid in discussing how he "prepared" for his Nobel prize in economics, and his descriptions of political and personal in-fighting in academe document an aspect often not shown. Simon has participated in some of the most wide-ranging intellectual developments of this century, and his autobiography surely will interest many readers.

Review

"As much as any one person, Herbert A. Simon has shaped the intellectual agenda of the human and social sciences in the second half of the 20th century For many readers, Mr. Simon's view of human endeavor, of love and of work, will seem emblematic not of the pre-Freudian rationalism-that-was but a new, sleeker, rationalism-to-be--a rationalism purged of utopian excess, committed to empirical studies, and wedded to the most modern technology."--Sherry Turkle, "New York Times Book Review"

Users Review

From reader reviews:

Elizabeth Pipkin:

Nowadays reading books be than want or need but also become a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge the rest of the information inside the book which improve your knowledge and information. The info you get based on what kind of reserve you read, if you want send more knowledge just go with training books but if you want sense happy read one together with theme for entertaining for example comic or novel. The particular Models of My Life (MIT Press) is kind of reserve which is giving the reader unpredictable experience.

Shirley Williams:

Models of My Life (MIT Press) can be one of your starter books that are good idea. We recommend that straight away because this e-book has good vocabulary that will increase your knowledge in language, easy to understand, bit entertaining but nevertheless delivering the information. The writer giving his/her effort that will put every word into enjoyment arrangement in writing Models of My Life (MIT Press) nevertheless doesn't forget the main place, giving the reader the hottest and also based confirm resource facts that maybe you can be one among it. This great information can certainly drawn you into completely new stage of crucial imagining.

Anthony Davidson:

As we know that book is essential thing to add our expertise for everything. By a book we can know everything we want. A book is a group of written, printed, illustrated or maybe blank sheet. Every year has been exactly added. This guide Models of My Life (MIT Press) was filled regarding science. Spend your extra time to add your knowledge about your technology competence. Some people has various feel when they reading some sort of book. If you know how big advantage of a book, you can really feel enjoy to read a e-book. In the modern era like today, many ways to get book which you wanted.

Richard Starkes:

As a student exactly feel bored for you to reading. If their teacher inquired them to go to the library as well as to make summary for some publication, they are complained. Just minor students that has reading's soul or real their leisure activity. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that looking at is not important, boring in addition to can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Models of My Life (MIT Press) can make you experience more interested to read.
