Editorial Review

From the Author

Scoring well on the AP Biology is important for biology placement credit and for admission into a college of your choice. To achieve a high score, you need to develop skills to properly apply the knowledge you have and quickly choose the correct answer. You must solve numerous practice questions that represent the style and content of the AP Biology questions. Understanding key science concepts is more valuable than memorizing terms.

This book provides over 1,500 biology practice questions that test your knowledge of all AP Biology topics. In the second part of the book, you will find answer keys and detailed explanations to questions, except those that are self explanatory. These explanations discuss why the answer is correct and - more importantly - why another answer that may have seemed correct is the wrong choice.

The explanations include the foundations and details of important science topics needed to answer related questions on the AP Biology test. By reading these explanations carefully and understanding how they apply to solving the question, you will learn important biology concepts and the relationships between them. This will prepare you for the AP Biology test and will significantly improve your score.

All the questions are prepared by our science editors who possess extensive credentials and are educated in top colleges and universities. Our editors are experts on teaching sciences, preparing students for standardized science tests and have coached thousands of undergraduate and graduate school applicants on admission strategies.

Used books may have outdated content. We make content updates regularly based on customers' comments, editorial input and latest test changes. The most current version is only available directly from Amazon (*sold & shipped by Amazon*), Barnes & Noble and Sterling Test Prep web store.

From the Inside Flap

Part 1: Evolution; Diversity and Unity of Life

- ? Evolution, natural selection, classification, diversity
- ? Populations, communities, conservation biology
- ? Animal behavior and evolution

Part 2: Cellular and Molecular Biology

- ? Photosynthesis
- ? Cellular metabolism and enzymes
- ? Eukaryotic cell: structure and function
- ? Molecular biology of eukaryotes
- ? Specialized cells and tissues

Part 3: Genetic Information of Living Systems

- ? DNA and protein synthesis
- ? Genetics

? Microbiology

Part 4: Biological Systems

? Plants: structure, function, reproduction

? Endocrine system

? Nervous system

? Circulatory system

? Lymphatic and immune systems

? Digestive system

? Excretory system

? Muscle system

? Skeletal system

? Respiratory system

? Skin system

? Reproductive system

? Development

Answer Keys & Explanations
