Computer Vision Technology for Food Quality Evaluation From Academic Press

Computer Vision Technology for Food Quality Evaluation, Second Edition continues to be a valuable resource to engineers, researchers, and technologists in research and development, as well as a complete reference to students interested in this rapidly expanding field. This new edition highlights the most recent developments in imaging processing and analysis techniques and methodology, captures cutting-edge developments in computer vision technology, and pinpoints future trends in research and development for food quality and safety evaluation and control. It is a unique reference that provides a deep understanding of the issues of data acquisition and image analysis and offers techniques to solve problems and further develop efficient methods for food quality assessment.

- Thoroughly explains what computer vision technology is, what it can do, and how to apply it for food quality evaluation
- Includes a wide variety of computer vision techniques and applications to evaluate a wide variety of foods
- Describes the pros and cons of different techniques for quality evaluation

Editorial Review

About the Author

BACK OF BOOK 17 March 2016

Dr. Da-Wen Sun is internationally recognized for his leadership in food engineering research and education and is a highly respected journal editor. He is the recipient of numerous awards and honors including election to the Royal Irish Academy in 2010, selection as a Member of Academia Europaea (The Academy of Europe) in 2011, induction as a Fellow of International Academy of Food Science and Technology in 2012, recipient of the International Association for Food Protection (IAFP) Freezing Research Award in 2013, recipient of the International Association of Engineering and Food (IAEF) Lifetime Achievement Award in 2015, and named as a Thomson Reuters Highly Cited Researcher in 2015.

Dr. Da-Wen Sun is internationally recognized for his leadership in food engineering research and education and a highly respected journal editor. He is the recipient of numerous awards and honors including election to the Royal Irish Academy in 2010, selection as a Member of Academia Europaea (The Academy of Europe) in 2011, induction as a Fellow of International Academy of Food Science and Technology in 2012, the International Association for Food Protection (IAFP) Freezing Research Award in 2013, the International Association of Engineering and Food (IAEF) Lifetime Achievement Award in 2015 and naming as 2015 Thomson Reuters Highly Cited Researcher. His many scholarly works have become standard reference materials for researchers in the areas of computer vision/hyperspectral imaging, computational fluid dynamics modelling, and vacuum cooling. Results of his work have been published in more than 400 peer-reviewed journal papers (Web of Science h-index = 66), among them; thirty papers have been selected by ESI as highly-cited papers, ranking him first in the world in Agricultural Sciences.

Users Review

From reader reviews:

Elliott Townsend:

Book is to be different for every grade. Book for children till adult are different content. As it is known to us that book is very important for all of us. The book Computer Vision Technology for Food Quality Evaluation has been making you to know about other understanding and of course you can take more information. It doesn't matter what advantages for you. The e-book Computer Vision Technology for Food Quality Evaluation is not only giving you considerably more new information but also being your friend when you feel bored. You can spend your personal spend time to read your guide. Try to make relationship with the book Computer Vision Technology for Food Quality Evaluation. You never sense lose out for everything in case you read some books.

Blake Westerman:

Your reading sixth sense will not betray anyone, why because this Computer Vision Technology for Food Quality Evaluation reserve written by well-known writer we are excited for well how to make book that

could be understood by anyone who else read the book. Written within good manner for you, still dripping wet every ideas and producing skill only for eliminate your own hunger then you still skepticism Computer Vision Technology for Food Quality Evaluation as good book but not only by the cover but also from the content. This is one guide that can break don't determine book by its include, so do you still needing yet another sixth sense to pick this!?! Oh come on your studying sixth sense already told you so why you have to listening to an additional sixth sense.

Ricky Bradley:

As we know that book is significant thing to add our knowledge for everything. By a guide we can know everything we would like. A book is a pair of written, printed, illustrated or blank sheet. Every year has been exactly added. This reserve Computer Vision Technology for Food Quality Evaluation was filled with regards to science. Spend your spare time to add your knowledge about your research competence. Some people has diverse feel when they reading the book. If you know how big benefit from a book, you can feel enjoy to read a reserve. In the modern era like currently, many ways to get book that you simply wanted.

Mary Ransom:

Do you like reading a reserve? Confuse to looking for your selected book? Or your book was rare? Why so many concern for the book? But virtually any people feel that they enjoy intended for reading. Some people likes reading, not only science book but also novel and Computer Vision Technology for Food Quality Evaluation or perhaps others sources were given information for you. After you know how the truly great a book, you feel wish to read more and more. Science e-book was created for teacher or even students especially. Those guides are helping them to include their knowledge. In different case, beside science reserve, any other book likes Computer Vision Technology for Food Quality Evaluation to make your spare time considerably more colorful. Many types of book like this one.
