Editorial Review

From the Publisher

We are very excited about Mr. Arnold's Workbook series. The feedback we have received has validated our instincts that the books are a long-needed breakthrough in music education. Mr. Arnold has culled from his many years of teaching both privately and on the university level, and has provided information and teaching approaches which have never been presented in quite this way. The serious student will find the books to be a real "Rosetta Stone" for music theory and its application, while the professional musician will find them to be bountiful compendiums of information and lifelong companions in the voyage of musical discovery.

From the Inside Flap

Many of my students have asked me how they can improve their music theory and fretboard knowledge. This book is an attempt to fill those needs.

Learning the language of music is imperative to becoming a professional musician or communicating intelligently with other musicians, but more importantly, applying this knowledge to your instrument will give you the ability to create music with greater flexibility, coherence, and confidence.

Future volumes of this Music Theory Workbook series will cover scales and diatonic chords of a key both of which are very important to playing and understanding music. See the final pages of this book for a complete listing and description of current music related publications.

A very special thank you goes to Tina Sobin for her patient and meticulous work in editing this book.
