**Cytopreparation: Principles & Practice (Essentials in Cytopathology)** By Gary Gill

*Cytopreparation: Principles & Practice* by Gary W. Gill fills a long-standing need for an easy-to-use and authoritative manual on the fundamentals of cytopreparation up-to-and- including microscopy, screening, and data analysis. The text describes in phenomenological terms the most common materials and methods of specimen collection through mounting for gyn, non-gyn, and FNA specimens, as well as the underlying mechanistic bases. The author provides his expertise and information that will empower and enable readers to review and improve their laboratories' cytopreparatory techniques as they apply to the vast majority of specimens. This unique volume provides facts that are not readily available anywhere. *Cytopreparation: Principles & Practice* is intended for everyone associated with, and involved in, making cytologic preparations that are useful for their intended purpose. It will serve as a valuable reference tool for educators in cytology and histology, cytotechnology and histotechnology students, cytotechnologists, cytopreparatory technicians, cytopathologists, anatomical/clinical pathologists, pathology residents and cytopathology fellows.
