

Lippincott's Primary Care Orthopaedics

By Paul A. Lotke MD, Joseph A. Abboud MD, Jack Ende MD

Lippincott's Primary Care Orthopaedics By Paul A. Lotke MD, Joseph A. Abboud MD, Jack Ende MD

4-STARs from Doody's Review

"This book is extremely well done. The material is effectively presented with abundant color illustrations. Important information and suggestions for primary care physicians are spot on, such as obtaining a standing radiograph for a patient suspected of having knee arthritis, among others. The advice to avoid excessive ordering of MRI studies by those not planning to implement the results in their treatment plan is a good strategy and a money saver. I highly recommend this book to all primary care physicians caring for patients with musculoskeletal disorders. It is currently the best work on this topic available." - Edward Abraham, MD, University of Illinois at Chicago College of Medicine, on behalf of Doody's Review Service

Part of the highly respected *Primary Care Series*, this 2nd edition of **Lippincott's Primary Care Orthopaedics** provides family practitioners, internists, nurse practitioners, physician assistants and osteopathic and chiropractic physicians with the reference source they need to confidently diagnose and treat the most common musculoskeletal patient injuries seen in an office setting.

This full-color, highly illustrated volume is designed to deliver the most useful information in a consistent and easy-to-reference format. Each chapter opens with a quick synopsis of the problem, followed by treatment recommendations and clinical pearls. Important sections like "Clinical Points", "Not to be Missed", and "When to Refer" are highlighted to better guide the busy physician in making treatment decisions.

Plus, there is an online companion website with text, images, patient handouts and videos of examination and injection procedures so you have access to the content anytime.

FEATURES:

- Contains age-related differential diagnosis
- Contains ICD 9 codes for quick reference
- Updated to include both primary and secondary lab information
- Companion website provides access to fully searchable text, patient education

handouts, images, and video clips.

Don't miss other titles in the Primary Care Series:

- *Lippincott's Primary Care Musculoskeletal Radiology*

978-0-7817-9377-3

- *Lippincott's Primary Care Dermatology*

978-0-7817-9378-0

- *Lippincott's Primary Care Psychiatry*

978-0-7817-9821-1

Users Review

From reader reviews:

Robert Crumrine:

Information is provisions for individuals to get better life, information today can get by anyone from everywhere. The information can be a know-how or any news even restricted. What people must be consider while those information which is from the former life are challenging be find than now is taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you find the unstable resource then you understand it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take Lippincott's Primary Care Orthopaedics as your daily resource information.

Lorraine Prinz:

People live in this new morning of lifestyle always aim to and must have the extra time or they will get wide range of stress from both everyday life and work. So , once we ask do people have spare time, we will say absolutely indeed. People is human not just a robot. Then we consult again, what kind of activity have you got when the spare time coming to you actually of course your answer will certainly unlimited right. Then ever try this one, reading textbooks. It can be your alternative with spending your spare time, often the book you have read is actually Lippincott's Primary Care Orthopaedics.

Heather Reader:

Are you kind of stressful person, only have 10 or even 15 minute in your moment to upgrading your mind talent or thinking skill even analytical thinking? Then you have problem with the book compared to can satisfy your short period of time to read it because this time you only find guide that need more time to be examine. Lippincott's Primary Care Orthopaedics can be your answer as it can be read by anyone who have

those short extra time problems.

Mathew Munz:

That publication can make you to feel relax. This kind of book Lippincott's Primary Care Orthopaedics was colourful and of course has pictures on there. As we know that book Lippincott's Primary Care Orthopaedics has many kinds or category. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and think that you are the character on there. So , not at all of book tend to be make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading which.
