Practice Problems for Mathematical Olympiad Competitions, Volume 3: Steve Dinh

This e-book comprises of many mathematical problems suggested by the author to help the prospective contestants preparing for the Mathematical Olympiad competitions around the world as well as to help the general audience in learning the concepts and foundations of higher mathematics.

These problems are made up and tailored in such a way to parallel those used in the past international and national Mathematical Olympiad competitions in both the format and degree of difficulty. The problems in this e-book are relatively at a lesser degree of difficulty compared to those in the previous e-books volumes I and II. Many of the author's previous suggested problems have actually been selected for those competitions as well as competitions taken places annually at many prestigious colleges in the United States.

Feel free to use these problems for the competitions in your country, but do cite their source on your test papers or on your website, and please let me know by sending an email to stevevdinh@yahoo.com.
