Editorial Review

From the Author

To achieve a high MCAT score you need to develop skills to properly apply the knowledge you have and quickly choose the correct answer. You must solve numerous MCAT practice questions that represent the style and content of the MCAT 2017. **Understanding key science concepts and how to apply them is more valuable on the MCAT 2017 than memorizing formulas and terms** (using MCAT flash cards) which is unlikely to significantly increase your score.

This MCAT 2017 prep book is different from the majority of other MCAT books. While other books either only superficially review science topics or provide MCAT practice questions with brief explanations, this book presents the science material in an **MCAT practice tests format and provides detailed explanations to each question**. These explanations discuss why the answer is correct and - more importantly - why another answer that may have seemed correct is the wrong choice. **The explanations include the foundations and details of important MCAT science topics needed to answer related questions on the MCAT**. By reading these explanations carefully and understanding how they apply to solving the question, you will learn important concepts and the relationships between them. This will prepare you for actual MCAT test and will **significantly improve your score**.

This book is designed to reflect the content of the new MCAT. It contains **4 Biological & Biochemical Foundations of Living Systems and 4 Chemical & Physical Foundations of Biological Systems MCAT practice tests**. Each test contains 59 passage-based and independent questions with the appropriate combination of biology, biochemistry, organic chemistry, general chemistry and physics topics tested on the MCAT.

All the content of our publications is prepared by our editors who possess extensive credentials, are educated in top colleges and universities and have been admitted to medical school with stellar MCAT scores. Our editors are experts on teaching, preparing students for the MCAT and have coached thousands of premeds on admission strategies.

Used books may have outdated content. We make content updates regularly based on customers' comments, editorial input and latest test changes. The most current version is only available directly from Amazon (*sold & shipped by Amazon*), Barnes & Noble and Sterling Test Prep web store.

Users Review

From reader reviews:

Charles Ginter:

Spent a free time for you to be fun activity to try and do! A lot of people spent their down time with their family, or their particular friends. Usually they doing activity like watching television, likely to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your free time/ holiday? Could be reading a book can be option to fill your totally free time/ holiday. The first thing you ask may be what kinds of book that you should read. If you want to test look for book, may be the book untitled Sterling Test Prep MCAT Practice Tests: Chemical & Physical + Biological & Biochemical Foundations can be good book to read. May be it might be best activity to you.

James Soltero:

Playing with family within a park, coming to see the ocean world or hanging out with good friends is thing that usually you will have done when you have spare time, in that case why you don't try factor that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Sterling Test Prep MCAT Practice Tests: Chemical & Physical + Biological & Biochemical Foundations, you are able to enjoy both. It is very good combination right, you still would like to miss it? What kind of hang-out type is it? Oh can occur its mind hangout fellas. What? Still don't buy it, oh come on its named reading friends.

James Harris:

With this era which is the greater individual or who has ability to do something more are more treasured than other. Do you want to become considered one of it? It is just simple solution to have that. What you must do is just spending your time not very much but quite enough to experience a look at some books. Among the books in the top checklist in your reading list is definitely Sterling Test Prep MCAT Practice Tests: Chemical & Physical + Biological & Biochemical Foundations. This book that is qualified as The Hungry Hillside can get you closer in turning out to be precious person. By looking way up and review this publication you can get many advantages.

Elizabeth Schwartz:

As a student exactly feel bored to reading. If their teacher asked them to go to the library or make summary for some book, they are complained. Just tiny students that has reading's spirit or real their hobby. They just do what the professor want, like asked to the library. They go to presently there but nothing reading really. Any students feel that reading is not important, boring in addition to can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Sterling Test Prep MCAT Practice Tests: Chemical & Physical + Biological & Biochemical Foundations can make you feel more interested to read.
