How to Predict Future Lottery Results Book 2: Know Tomorrow's Number Today on a Month-by-Month Basis. By Francis Isaac

This book is designed for lottery players around the world. The predictions in this book are based on the understanding of the behavior and complexity of random systems. Understanding the complexity of random systems is the best tool that we have of predicting future lottery results. The predictions in this book are on a month-by-month basis because I believe that knowing that by the end of the month you will definitely win a certain amount of money, but just not knowing how much it is going to be yet, is a wonderful feeling. That is how I feel each month, and I would also like all those who buy this book to have the same feeling every month. First of all, I want to show that it is possible to predict future lottery numbers at whatever combination, be it two or three or four or five or six number combinations. My first book, titled How to Predict Future Lottery Results, did present two number combinations. You can see how accurate the predictions from my first book have been by checking the 'Results' page (xvii) of this book. The first book was published on December 18, 2013. Results from 6/49 Lotteries around the World after that date have so far verified and validated my predictions on a month-by month basis. This book presents a two months' snapshot of the matching numbers from eight countries around the world during January and February 2014. These results correspond with the predictions in my first book. I have now decided to publish the combinations for predicting three numbers on a month-by-month basis.

Editorial Review

About the Author
Francis Isaac is a scientist, mathematician, researcher, and a professional teacher who lives in Dorset. He is the founder of the website www.playchance.co.uk, which offers syndication and the opportunity to increase the chance of winning the 6/49 lotteries around the world. One of his major projects, which was also a groundbreaking discovery, was research based on the creation of new organometallic compounds, which can be used to cure or ease the pain of Alzheimer's disease sufferers. He is a member of the Author Learning Center and has read widely and extensively including many books on the strategies of winning the lottery. He has a master's degree in research in chemistry from Essex University in Colchester and has over twenty years experience in science and research including nineteen years of studying the national lottery, resulting in regular personal winnings. He is a high-profile teacher, and his students achieved some of the best GCSE and A-level results at Poole Grammar School in Dorset. He readily gives out researched lottery numbers to people, and there are testaments of winnings even in countries as far as Canada. His students and their parents regard him as a famous scientist and mathematician, and they have all encouraged him to write this book. This is his second book.
