Interviews in Qualitative Research By Nigel King, Christine Horrocks

Interviewing is used very widely in qualitative research, and takes many different forms. It is also a method that is constantly evolving, in response both to theoretical and technological developments. The authors present a clear and thorough guide to the use of interviews in contemporary qualitative research. The book also features a chapter which introduces the principles and practice of the thematic analysis of interview data, and the book concludes with a detailed consideration of the use of interviews in two major qualitative research traditions: phenomenological and narrative approaches.
