

Neuropsychology of Cancer and Oncology (Contemporary Neuropsychology)

By Chad Noggle PhD ABN

Neuropsychology of Cancer and Oncology (Contemporary Neuropsychology) By Chad Noggle PhD ABN

"This book, in both its direct and indirect inferences, points to the need for disease-specific neurocognitive methods in broadly occurring CNS and non-CNS cancers... All in all, this is a beautifully conceptualized book that should be on the bookshelves of many specialists who work in the very challenging field of Oncology."--Carol L. Armstrong, PhD, Children's Hospital of Pennsylvania, Archives of Clinical Neuropsychology

Interest in the neurocognitive and sensory impairments resulting from many cancers and their interventions has grown considerably over the past decades as an important aspect of quality of life issues for cancer patients and survivors. *The Neuropsychology of Cancer and Oncology* features current findings on the neuropsychological effects of these cancers and their treatments along with the most promising neuropsychological and behavioral health interventions available to mitigate these deficits. This edited volume, part of the Contemporary Neuropsychology series, bridges the gap between the knowledge of neuropsychologists, who are grounded in the biological and physiological bases of cognition and behavior but not in pathology, and that of oncologists, who often lack expertise in the neuropsychological aspects of cancer.

This text first addresses the biological components and medical care of these cancers, and issues relating to bioimaging. It then discusses the neurological impact of these cancers as they affect different functions, such as memory, learning, and sensory-motor ability, as well as discusses the effects of childhood cancers on neurological development. State-of-the-art neuropsychological and behavioral health interventions are considered, including neuropsychological/cognitive rehabilitation and habituation, pharmacological interventions, and collaborative medical practices. This text is a unique and timely resource for clinical neuropsychologists, clinical psychologists, neurologists, oncologists, oncology nurses, and neurorehabilitation professionals.

Key Features:

- Bridges the gap of knowledge between neuropsychologists and oncologists
- Explores the most current research on the neuropsychological effects of various cancers and their treatments
- Provides state-of-the-art information on promising neuropsychological and behavioralñhealth interventions for impairments created by cancers and their treatments
- Represents a collaboration between some of the foremost scholars and practitioners in neuropsychology and oncology

Bridges the gap of knowledge between neuropsychologists and oncologists Explores the most current research on the neuropsychological effects of various cancers and their treatments Provides state-of-the-art information on promising neuropsychological and behavioral?health interventions for impairments created by cancers and their treatments Represents a collaboration between some of the foremost scholars and practitioners in neuropsychology and oncology "

About the Author

Chad A. Noggle, PhD, is Assistant Professor of Clinical Psychiatry at Southern Illinois University School of Medicine. He completed an internship in Neuropsychology through the BSU Consortium and a two-year post-doctoral residency at the Indiana Neuroscience Institute at St. Vincent's Hospital with specialization in Pediatric and Adult/Geriatric Neuropsychology. He is co-editor of The Encyclopedia of Neuropsychological Disorders, also to be published through Springer Publishing Company as well as the co-editor of the Contemporary Neuropsychology series. To date, Dr. Noggle has published more than 200 articles, book chapters, encyclopedia entries, and research abstracts and has made over 80 presentations at national and international conferences in neuropsychology. He currently serves as a reviewer for a number of neuropsychology journals. Dr. Noggle is a member of the American Psychological Association (Divisions 40, 5, &16), National Academy of Neuropsychology, and International Neuropsychological Society. He is a licensed Psychologist in both Illinois and Indiana.||Raymond S. Dean, PhD, is Past President of the Clinical Neuropsychology Division of the APA and the National Academy of Neuropsychology. He has been the George and Frances Ball Distinguished Professor of Neuropsychology and Director of the Neuropsychology Laboratory at Ball State University since 1984. As a Parachek-Frazier Research Fellow, he completed a Ph.D. in School/Child Clinical Psychology at Arizona State University in 1978. Dr. Dean completed an

internship focused on neuropsychology at the Arizona Neuropsychiatric Hospital and postdoctoral work at the University of Wisconsin at Madison. He has been awarded the Lightner Witmer Award by the School Psychology Division of the American Psychological Association and both the Outstanding Contribution Award from the National Academy of Neuropsychology and the Early Contribution Award by Division 15 of the APA. In addition to his academic appointments, Dr. Dean served as Distinguished Visiting Faculty at the Staff College of the NIMH. He is a Diplomate of the American Board of Professional Psychology, the American Board of Professional Neuropsychology, and the American Board of Pediatric Neuropsychology. He is a Fellow of the American Psychological Association (Divisions: Clinical, Educational, School and Clinical Neuropsychology), the National Academy of Neuropsychology, and the American Psychopathological Association. He also served as Editor of the Archives of Clinical Neuropsychology, Journal of School Psychology and the Bulletin of the National Academy of Neuropsychology. Dr. Dean has published some 500 research articles, books, chapters and tests, including the Dean-Woodcock Neuropsychological Assessment System, one of the most important and often-cited neuropsychological assessment batteries. He is co-editor of The Encyclopedia of Neuropsychological Disorders, also to be published through Springer Publishing Company as well as the co-editor of the Contemporary Neuropsychology series. For his work he has been recognized by awards from the National Academy of Neuropsychology, the Journal of School Psychology, and the Clinical Neuropsychology Division of APA. Dr. Gary Alan Johnson is professor of obstetrics and gynecology and chief of the gynecologic oncology division at Southern Illinois University School of Medicine. He is director of the Gynecologic Oncology Clinic at the SimmonsCooper Cancer Institute at SIU. Previously, he was on the faculty for 15 years at the University of Oklahoma College of Medicine in Oklahoma City, most recently as an associate professor of obstetrics and gynecology and the director and chairman of the palliative care committee. While at Oklahoma, he was awarded numerous teaching awards. He completed his obstetrics and gynecology residency at the University of Wisconsin in Madison (1990), his medical degree at the University of Kansas School of Medicine in Kansas City (1986) and his bachelor's degree in accounting at Washburn University in Topeka, Kan. (1977). He is board certified in obstetrics and gynecology and gynecologic oncology by the American Board of Obstetrics and Gynecology. He has been involved in 30 clinical trials, published more than 40 professional journal articles and has given more than 100 presentations. His research interests include ovarian cancer and palliative care. |Dr. Thomas H. Tarter heads the Section of Urologic Oncology within the Division of Urology at Southern Illinois University School of Medicine. Dr. Tarter earned his PhD degree at the Oregon Health Sciences University School of Medicine, where he studied the interactions of the male reproductive system with the immune system. As a graduate student, he won the New Investigator Award of the American Society of Andrology. He continued his studies as a fellow at the Population Council Center for Biomedical Research on the campus of the prestigious Rockefeller University in New York City. Dr. Tarter attended medical school at the Albany Medical College. After medical school, he completed residency in Urology at the University of Southern California, where he was trained in urologic oncology. Dr. Tarter has practiced urologic surgery in Central Illinois for the past five years with the Carle Clinic Association, where he established a reputation for bladder reconstruction after surgery for bladder cancer, and where he co-founded an interdisciplinary Prostate Cancer Center. Dr. Tarter has received numerous awards for teaching excellence at SIU and published his original, peer-reviewed research in such journals as Journal of Urology, Journal of Andrology, Archives of Andrology, and Biology of Reproduction. Dr. Rhonda L. Johnson is an assistant professor of psychiatry at Southern Illinois University School of Medicine and chief of the oncology patient and family supportive services division for the Simmons Cooper Cancer Institute at SIU. Johnson previously was an assistant clinical professor of gynecologic oncology at the University of Oklahoma Health Sciences Center (OHSC) in Oklahoma City and a psychologist at the Oklahoma Cancer Institute (2002-08). She completed a one-year fellowship at OHSC (2002) and earned her doctoral degree in counseling psychology from Oklahoma State University (OSU) in Stillwater (2001). She completed her master's degree at the University of Central Oklahoma in Edmond (1997) and her bachelor's at OSU (1975). Johnson has authored more than 15 professional articles and has served as an ad hoc reviewer

for Cancer.

Users Review

From reader reviews:

Christopher Price:

What do you regarding book? It is not important to you? Or just adding material if you want something to explain what you problem? How about your extra time? Or are you busy particular person? If you don't have spare time to perform others business, it is make you feel bored faster. And you have extra time? What did you do? Everyone has many questions above. They need to answer that question since just their can do in which. It said that about guide. Book is familiar in each person. Yes, it is right. Because start from on kindergarten until university need this Neuropsychology of Cancer and Oncology (Contemporary Neuropsychology) to read.

Glory Ruiz:

In this 21st one hundred year, people become competitive in most way. By being competitive now, people have do something to make these survives, being in the middle of the particular crowded place and notice by surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Sure, by reading a book your ability to survive boost then having chance to stand than other is high. For you personally who want to start reading the book, we give you this kind of Neuropsychology of Cancer and Oncology (Contemporary Neuropsychology) book as beginning and daily reading reserve. Why, because this book is usually more than just a book.

James Butler:

You are able to spend your free time to study this book this reserve. This Neuropsychology of Cancer and Oncology (Contemporary Neuropsychology) is simple to bring you can read it in the area, in the beach, train as well as soon. If you did not possess much space to bring the actual printed book, you can buy typically the e-book. It is make you quicker to read it. You can save the particular book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

Doris Stone:

Reading a guide make you to get more knowledge as a result. You can take knowledge and information from your book. Book is published or printed or highlighted from each source in which filled update of news. On this modern era like today, many ways to get information are available for you actually.
